

Idaho House of Representatives

Legislature.Idaho.Gov

Joint Statement

July 29, 2021

Most employers are choosing to inform and educate employees regarding COVID vaccines/shots.

However, some Idaho employers have recently threatened employees with job loss if they refuse the COVID vaccines/shots.

We believe the right to refuse invasive medical procedures and experiments, including vaccinations, inoculations, immunizations, and genetic modulations (gene therapy), is paramount to the interest of the employees.

Other legislators have drafted similar letters of support for their districts to try to allow as many legislative members as possible the opportunity to sign on in a short amount of time. Those who have signed on to this letter thus far, unite with the following:

We do hereby support legislation and the process to properly protect the physical and health freedoms of Idaho employees from mandatory COVID vaccinations/shots.

Reconveying of the legislature is the necessary next step in upholding and protecting the rights of the people.
